

BUILDING ACTIVITY IN EASTERN CONNECTICUT

Addition for County Home Started

Cellar Has Been Dug And Foundation Put In—Foundation And Walls Have Been Laid At Atlantic Carton Co.—Washington Street Block Has Been Completed—Other Norwich Building Activities In Norwich And Vicinity.

The work on the erection of the new dormitory building for the County Home on Smith avenue, has been commenced by Contractor Dolan of New London. The cellar has been dug and the foundation and basement have been completed. In the basement will be located shower baths, set tubs and other conveniences. The walls of the building have been to the first story above the basement windows.

Foundation Laid.
The foundation and walls for the Atlantic Carton Co. have been commenced and the foundation is nearly complete. Part of the walls have been raised to the first story. Peck, McWilliams are doing the work.

Duplex Block Completed.
The duplex block on Washington street for Caesar DelCarlo has been completed and is ready for occupation.

Coal Pocket Nearing Completion.
The coal pocket for the Shetucket Coal & Wood Co. is nearing completion and will soon be ready for use. The pocket will be two stories high with a capacity of 2000 tons of coal. The carts will be loaded from overhead which will be considerable handling. The unloading apparatus will permit the unloading of one car per hour or about 60 tons. The work is being done by the Connecticut Engineering company.

Working on Second Story.
The work on the addition at the mill of Joseph Hall & Son at Trading Cove is progressing and the workmen are working on the second story. Con-

tractor C. M. Williams is doing the work.

Ponemah Storehouse.
The storehouse for the Ponemah Co. is being rushed and the men are at work on the first story, the foundation having been laid. Contractor Torrance is doing the work.

Boiler House Nearly Finished.
Contractor Torrance has nearly completed the new boiler house for the Hall Bros. mill at Hallville. The roof is now being put on and that remains to be done is a few finishing touches. The two big boilers are now being set in place.

Valentine Reich & Co. of this city have the contract for the erection of a frame house on Fowler avenue for Antoinette Grodzka. The house will be 32 and two stories high. The building will be of spruce, the floor joists of yellow pine and the claddings and shingles of red cedar.

Modern Residence to Be Erected.
Ground has been broken and the staves set on a lot in Linden Park way for a modern residence which Nelson V. Porter is to have erected.

Garage for Grosvenor Ely.
Peck & McWilliams have the contract for a frame garage to be erected on Broad street for Grosvenor Ely. The garage will be 21x21 in size and will be of wood construction.

Union Street Garage.
Charles A. Chamberlain of 33 Union street has given the contract for the erection of a brick and concrete garage at his premises to Patrick E. Sweeney of Fitchville. The garage will be 21x42x10 and will be electrically lighted.

NAVAL STATION.
Plans are being completed for a power plant and distributing system for the United States government to be built at the submarine base. F. R. Harris, chief bureau of yards and docks, navy department, Washington is in charge. The cost will be about \$450,000.

Plans are under way also for new barracks to be built by the United States government at a cost of \$200,000.

BUILDING AND BUSINESS.
Present Situation Shows but Little Activity.

The exchanges of the clearing houses in New Haven, Hartford, Waterbury and Springfield for the past week show scarcely any change in New Haven as compared with the week of the previous year, while Hartford and Springfield show increases of 3.3 and 4.7 per cent, respectively, with a decrease of 1.3 per cent in Holyoke.

Plastering Cottage.
The cottage which Frank Jenney is building on Watkinson street is now being plastered.

Huntington Street Stores.
Work has been started on a building to be erected for M. H. Hollander on Huntington street. It will be of brick, 22x22 feet, two story high, and will contain two stores.

Will Build Storehouse.
Lubchansky Bros. are erecting a new building on Howard street for themselves. It will be 21x32 feet, costing \$1,500, and will be used as a storehouse.

Division Street House.
Foundations are being laid on Division street for a new house which Joseph V. Sousa will erect for himself. It will be of wood, 28x48 feet, arranged for two families, with six rooms each, and provided with all modern improvements.

Additional Government Buildings.
Arrangements are being made for the erection of additional buildings for the United States government, as follows: Barracks, two buildings for officers' quarters, costing \$100,000; laundry, to cost \$20,000; house for commissary and commissary, to cost \$70,000 and \$26,000 respectively. The projects are in charge of F. R. Harris, chief Bureau of Yards and Docks, Navy Department, Washington, D. C.

Ladies! Why Keep Corns?
Lift a corn or callus right off without one bit of pain.

Yes! You truly can lift off every hard corn, soft corn or corn between the toes, as well as hardened calluses on bottom of feet, without one bit of pain.

A genius in Cincinnati discovered frezone. It is an ether compound and in tiny bottles of this magic fluid can now be had at any drug store for a few cents.

Apply several drops of this frezone upon a tender, aching corn or callus. Instantly all soreness disappears and shortly you will find the corn or callus so shriveled and loose that you lift it off with the fingers. You feel no pain while applying frezone or afterwards.

Just think! No more corns or calluses to torture you and they go right out causing one twinge of pain or soreness. Keep a tiny bottle of the frezone and never let a corn or callus ache twice.

YOU DEMAND GOOD CEMENT
GOOD SAND AND GRAVEL ARE JUST AS IMPORTANT.
All Our Products Are Graded and Washed and Cost No More.
Deliveries by C. V. R. R. and by Water.
THE NEW LONDON SAND & STONE COMPANY
25 STATE STREET, NEW LONDON, CONN.

buildings in Bridgeport and Hartford, warehouse in Hartford, coal pocket in Springfield, and one, two and three-family houses in New Haven, Bridgeport, Hartford, Waterbury, Stamford and Greenwich.

PUTNAM.
In New London there were four sales of realty last week to eight persons, the loans totalling \$32,900 and \$63,825 for the respective weeks.

MIDDLETOWN.
Dennis O'Brien & Sons have the contract for a building to be erected on the corner of the Central National Bank on Main street for the Middlesex Chapter of the Red Cross. It will be a concrete structure, 42x70 feet.

AGRICULTURAL INTERESTS.
The McIntosh and Wealthy varieties.

THE DAILY PER CAPITA CONSUMPTION OF MILK.
Estimated That It Is Little More Than a Glass a Day.

While it is difficult to compile any accurate figures on the daily per capita consumption of milk, it is generally conceded that the average for the United States is about 3 of a pint. This is a little more than a glass a day. That this is too small an amount is beyond question.

Adults in particular should remember the days of their youth and use more milk than they do. Were it not for the infant, per capita consumption would be much less. The average for the United States is about 3 of a pint. This is a little more than a glass a day. That this is too small an amount is beyond question.

THE BEAN WEEVIL.
How to Treat Beans If They Become Infested.

The farmers and gardeners of Connecticut have been urged to grow more beans, and the reason is that beans are frequently damaged by the bean weevil. The object of this article is to explain how they may be treated to prevent this trouble.

The bean weevil causes beans to become "wormy" is known as the bean weevil, a small, grubby beetle about one-eighth of an inch long with its head and thorax black and its abdomen brown. It appears to have outgrown its coat as its wings are short leaving a bare, naked body.

There is no method of preventing injury in the field so that all measures of control must be applied to the harvest seed.

The usual method of control advised is to fumigate the newly harvested beans with carbon bisulphide. This can be done in a tight bin, box or barrel. An empty kerosene oil barrel is suitable. It will hold about five bushels and requires a gallon of carbon bisulphide for treatment.

For larger quantities use two or three barrels to one hundred bushels of beans. Place the liquid in shallow pans on top of the seed. It evaporates quickly, forming a poisonous gas which being heavier than air settles down around the beans, killing the weevils.

The top may be covered with burlap, blanket and boards to make the barrel tight as possible. Fumigate for forty-eight hours, then open the barrel. As carbon bisulphide does not evaporate quickly at low temperatures, fumigations should be done when the temperature is above 60 degrees.

The gas is inflammable and explosive so that no fire, light or lamp should be allowed near until after the fumes have disappeared. The fumes should not be inhaled as a headache or worse illness may result.

Carbon bisulphide may be bought in small quantities from dealers who sell it in ten pound lots at 15 cents per pound.

For those who have smaller quantities of beans, there is a simpler method of fumigation. The bean weevil in all its stages is subjected to a temperature of 130 degrees for half an hour. When treating a quantity of beans, the heat will not reach the center of the mass quickly, so that a long exposure is necessary.

To treat beans, place them openly in shallow pans into a warm oven for an hour or more. If the beans are to be used for seed, do not let the heat go above 140 degrees as the germinating power will be injured.

It is not to be selected in this way for the entire field, a plot should be planted next year with disease-free seed. This should furnish seed for the next year's crop, but should be looked over carefully for diseases at harvest time. Any poor or diseased plants appearing in the seed plot should be pulled up and destroyed.

will be a concrete structure, 42x70 feet.

GROTON.
Plans are being estimated for the two houses to be erected for the New London Ship and Engine company in Groton. One will be a semi-detached house for the master and the other a cottage for a single family.

BUILDING OPERATIONS IN NEW ENGLAND.
Statistics of building and engineering operations in New England as compiled by the F. W. Dodge company for the week ending August 22, 1914.
